Note: Data were combined for hospitals with the same provider number and different division codes.

1 - The number of cases/patients is too few to report.

3 - Results are based on a shorter time period than required.

5 - Results are not available for this reporting period.

7 - No cases met the criteria for this measure.

Time to ECG = Average number of minutes before outpatients with chest pain or possible heart attack got an ECG (lower numbers are better).

Time to Transfer to Another Hospital = Average number of minutes before outpatients with chest pain or possible heart attack were transferred to another hospital (lower numbers are better).

Aspirin at Arrival = Outpatients with chest pain or possible heart attack who got aspirin within 24 hours of arrival (higher numbers are better).

Fibrinolysis Within 30 Minutes = Outpatients with chest pain or possible heart attack who got drugs to break up blood clots within 30 minutes of arrival (higher numbers are better).

Preventive Antibiotics Started = Outpatients having surgery who got an antibiotic at the right time - within one hour before surgery (higher numbers are better).

Preventive Antibiotic Received = Outpatients having surgery who got the right kind of antibiotic (higher numbers are better).
